SmogCheck: 2 Missing Files GitHub Par Add Karna

Roman Urdu mein asan guide - laptop Chrome se, sirf 5 minute ka kaam.

Seedha jawab: Ye dono files **usi pehli wali repo** mein add karni hain. Nayi repo **nahi** banani.

```
https://github.com/animated4ai/SmogCheck
```

Files kahan se leni hain? Kahin se download karne ki zaroorat **nahi** hai. Dono files ka pura text isi guide mein neeche diya hai. Aap GitHub par hi file bana kar woh text copy-paste kar dein ge - download wala masla hi khatam.

File 1: build.gradle.kts

1. Laptop Chrome mein repo kholein (upar wala link) aur **animated4ai** account se sign in hon.
2. Repo ki file list ke upar **Add file** button dabayein, phir **Create new file** chunein.
3. Naam wali jagah mein ye likhein: `build.gradle.kts`
4. Neeche bade khane mein ye pura text paste kar dein:

```
// Top-level build file
plugins {
    id("com.android.application") version "8.5.2" apply false
    id("org.jetbrains.kotlin.android") version "2.0.20" apply false
    id("org.jetbrains.kotlin.plugin.compose") version "2.0.20" apply false
}
```

5. Neeche green **Commit changes** button dabayein. File repo mein aa jayegi.

Ye file kyun zaroori hai? Is ke baghair app build nahi hoti, kyunki Android aur Kotlin ke versions isi file mein likhe hain. Ye add ho jaye to repo se download kiya gaya code Android Studio mein build ho sakega.

File 2: .gitignore (hidden file wala masla)

.gitignore upload nahi hoti kyunki Windows use hidden file samajhta hai. Hal: **upload bilkul na karein** - File 1 ki tarah GitHub par direct **Create new file** se bana lein, is tareeqe mein ye masla nahi aata.

1. Usi repo mein phir **Add file** dabayein, phir **Create new file** chunein.
2. Naam wali jagah mein bilkul ye likhein - shuru mein dot (.) lazmi hai: `.gitignore`
3. Neeche bade khane mein ye pura text paste kar dein:

```
# Gradle
.gradle/
build/
app/build/
local.properties
*.iml
.idea/
# Signing - never commit keys
*.jks
*.keystore
signing.properties
# OS
.DS_Store
Thumbs.db
```

4. Green **Commit changes** dabayein. Bas - .gitignore repo mein ban jayegi.

Akhir Mein: Repo Description

1. Repo ke main page par dayein (right) taraf **About** ke samne **gear icon** dabayein.
2. Description wali jagah mein ye line paste kar dein:

```
SmogCheck is a free offline Android app that estimates smog from a photo
of the sky - giving a 0-100 score, severity level, and health tips in
English and Urdu.
```

3. **Save changes** dabayein.

Akhri Check

- Repo ki file list mein **build.gradle.kts** nazar aaye - ho gaya.
- Repo ki file list mein **.gitignore** nazar aaye - ho gaya.
- About mein description nazar aaye - ho gaya.

Teeno cheezein ho jayein to bas **"done"** likh dein - repo live dobara check kar ke confirm kar diya jayega ke app ka code ab download aur build ke liye tayyar hai.
